Things to take into consideration before applying admission in ukraine universities.

1. As you know studying in Ukraine or higher education in ukraine is cheaper than other European countries, but you must take into consideration other factors through out your study periods, apart from your tuition fees you must preapare atleast \$150 to \$200 every month for other expences. Expences varies from students to students and their living status in ukraine,like some students dont like the hostel and live in flat in that case expences will be more then \$200 per month.In the beggining year students should not rely of any kind of part time job or financing their expences themselves as they must know the place ,learn the language a little bit,know the people and their surroundings.

2. Make sure with your study in ukraine consultant or directly with the university that you really satisfy all their admission criteria to enter into the prestigious ukrainian universities you choose,you must also read carefully the section on general requirements to study in Ukraine.

3. Make sure the university you want to study in ukraine, is authorised to teach the programm in english language(and MCI approved),sometimes the consultants or agents can send you admission letters or invitation letters from the university where medium of instruction is not english or (not MCI Approved),so be careful and check many times that they must teach the program in english.

So, while making the final decesion to study in ukraine,must take notice of these three very important factors.
